

Demonstration Rig

Spin UK Ltd have manufactured a **Demonstration Test Rig** to highlight our engineering and manufacturing capabilities.

The **Demonstration Test Rig** has been designed to perform a Pump Leak and Durability test. This allows us to highlight the main benefits of our **SpinTest Lite** for use within a production environment

The rig has been produced to highlight our **SpinTest Lite** software and IO link capabilities and can easily be adapted to suit your unique requirements.

- Integrated barcode scanner and printer.
- IO Link master switch
- Flow
- Pressure
- Temperature
- Level

Running our **STL front-end software** package, designed to be programmed without the need for specific software engineers.

All of the data is logged and stored ready for use in reports, trends and quality documentation.
